

# World-Class. World-Wide.

The shipbuilding expertise of Fincantieri is unrivaled. With 21 shipyards on four different continents, nearly 20,000 employees, and a 200-year history of building more than 7,000 ships, Fincantieri ranks as a global leader in quality, craftsmanship and technological innovation.

Fincantieri has recently completed a \$74.5 million capital expansion program at Marinette Marine designed to streamline workflow and reduce cost. This investment and the transfer of technology from the parent has transformed MMC into a modern ship manufacturing powerhouse, capable of simultaneously building five Littoral Combat Ships in serial production.
